

Technical Sheet

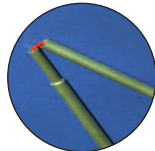

D4 Standard Banner Specifications

The D4 banner stand is a self assembly tensioned cable banner system. All components are lightweight and of high quality making it both portable and durable. Travel bags or cases are supplied with all stands. Standard D4 Displays are available in graphic widths of 600mm and 800mm, with the 800mm model available in standard and tall heights. They can display a wide variety of banner materials from PVC films through to mesh fabrics.

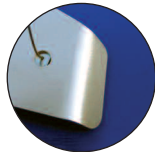

Kit Prices On Application

Self levelling guides ensure banners are hung straight

Elasticated masts for quick assembly

Simply push the cable grip through the hole to connect cable to baseplate

D4's are delivered in soft travel bags which securely house the cables, masts, battens and base components and with ample room for the rolled up graphics.

D4 Curve Specifications

D4 Curves use a single pair of curved aluminium bars to create either concave and convex displays. They are available in two graphic widths of 1000mm and 1200mm. Using multiple D4 Curve's together you can create graphic walls and rooms. This makes the D4 Curve an extremely versatile option for those wishing to build larger displays. Three 1 metre systems can pack into a single travel case, making the D4 Curve compact and easy to transport.
