

Technical Sheet

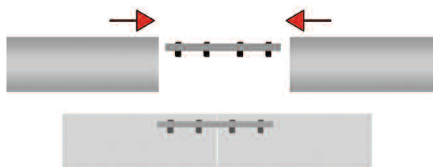

Fastrack Hanging Systems

Fastrack can be used to hang conventional banners with tension wires and fixing accessories. The system can also be manufactured to create hanging shapes.

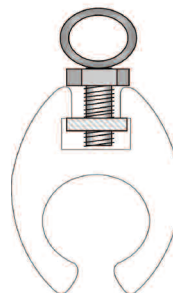

Fastrack

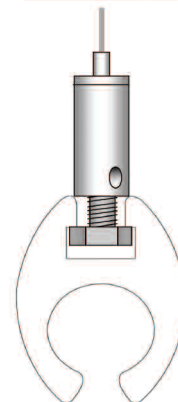

Internal Joining Spigot

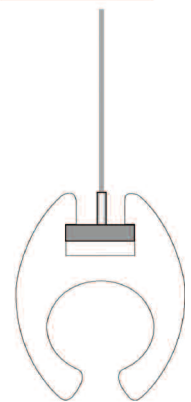

Eyebolt

Clutch and Loop

Stud and loop

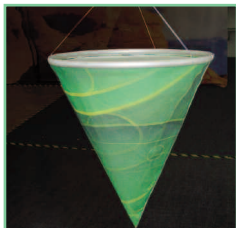

Systems are made to specific sizes. Prices are on application with your specification.

Technical Sheet

Fastrack - Freestanding and Exhibition

Curves and straight frames can be connected together to form structures. Self supporting shapes can be designed as a simple alternative to exhibition stands.

Fastrack banner systems can be fitted with support feet allowing the frames to become large graphic walls or backdrops.

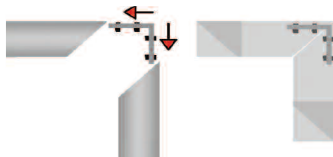

Fastrack

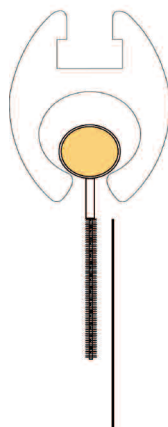

Internal Joining Spigot

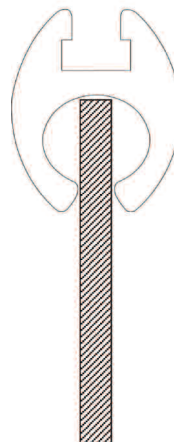

Internal Corner Spigot

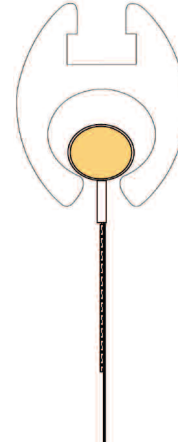

Fastrack Velcro Keder

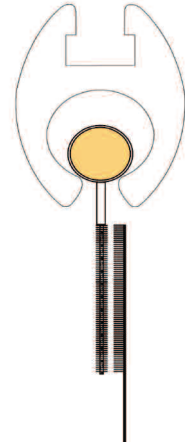

Support upto 5mm rigid panels

Fastrack keder can be sewn or welded to the perimeter

Fastrack velcro keder

Fastrack frames and curves can be designed to provide a cost effective exhibition stand. Fastrack can be broken down and shipped anywhere in the world at a fraction of the cost of an equivalent size exhibition stand.

Systems are made to specific sizes. Prices are on application with your specification.

Technical Sheet

Fastrack - Wall Mounted and Winch Systems

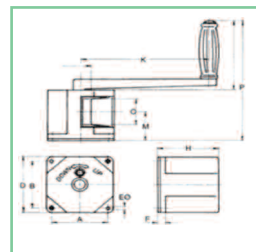

The Fastrack Wall Mounted Winch System is designed to hold large banners but allow easy access enabling the banners to be changed quickly. Simply release the frame, wind the banner down, slide the old banner out, replace with the new one and wind it back up into the frame.
